## Minnesota River Valley CTE Collaborative

### MINNESOTA RIVER VALLEY CTE COLLABORATIVE

The Minnesota River Valley CTE Collaborative and its five school partners (Lakeview, Montevideo, Renville County West, Yellow Medicine East, and MACCRAY) received \$32,750 in LYFT Pathways funding to formalize the Collaborative and to expand the number of shared-CTE courses from its initial Intro to Medical Careers course to include up to 12 shared-CTE courses. The added courses include: Introduction to Manufacturing and Engineering, Electrical Controls, Information Technology Exploration, Introduction to Residential Electrical/Plumbing/HVAC, Food and Nutrition, Child Development, Nursing Assistant, Networking Basics, Introduction to Education, Industrial Construction Methods, Tiny House/Fish House Construction, and Introduction to Traditional and Renewable Energy.

The Collaborative offers the courses through a hybrid delivery format with students from the participating schools meeting several days a week in person and the remaining days on-line in their home school or participating in work-based learning experiences at local businesses. Many of the classes are offered for college credit through Minnesota West Community and Technical College.

For more information contact Bruce Bergeson at Minnesota River Valley CTE Collaborative at [bbergeson@mrved.net](mailto:bbergeson@mrved.net).
