## Pathways Technology

Jackson County Central, Martin County West and Heron Lake-Okabena High Schools, and AGCO received a \$15,000 LYFT Pathways grant to provide engineering and manufacturing experiences to high school students. The grant funding will provide a variety of industry-based design and manufacturing equipment that students will use during school year and summer courses as they develop the skills needed by industry. AGCO will train students in the classroom and provide students with demonstrations and tours at their manufacturing facility.
